Art Enrichment Programs Designed For Seniors

On The Gogh Studio has a mission to enrich and inspire people of all ages through creativity and art. Our programs provide tangible physical and mental health benefits by providing opportunities for creativity and group participation, as well as improving mood and slowing memory loss in older adults. Our classes are educational and fun, with just the right amount of leisure to create an enjoyable experience for everyone, no matter the skill level.

How It Works:

One of our artist's will visit your community center and teach a 1.5-2 hour painting lesson, where the class will learn about painting techniques and brush strokes. Everyone will be an artist by the end because our lessons are easy to follow along with, and most importantly, fun! Plus, you'll have a great new piece of artwork to add to your wall!

"Our residents have such a great time! Every class we do something different and fun!"

"The artists were really great and patient, nobody ever felt left behind."
